It encourages the children in their motoric and also in their emotional, mental and social growth. The children are profiting very much from using our space of exercise and our large outdoor area. Regular excursions are also part of our concept. By our fixed timetable we are offering to your children some kind of orientation and a feeling of stability.

We are an established Montessori children day-care center since 1993 attending three groups in the morning and one group the whole day. From 2013 on a day nursery for children of less than three years will be annexed. The pedagogy of Maria Montessori forms the basis of our pedagogic acting. Religion is part of our daily pedagogic work and is guiding us throughout the year. A further focus is on a holistic health education. It equally includes the social, cognitive as well as physical development of the children. The forming of the personality as well as the individual processes of growing are based on this concept.

The day-care center offers space for 2 groups separated according to age with a maximum of 18 children per group. We care for children at the age of three to six years, in special cases also younger children. The recording is possible on a monthly basis. Please talk to us about how to get a day-care place. Our pedagogical focusing is based on a pedagogic approving manner which meets every child at „eye level“. We work following Danish concepts which can be seen on our homepage. Altogether one of our most important tasks is to transmit the Danish language and culture. Naturally we also sit in circles, we have got pedagogical themes weeks, parents projects, motor activities as i. e. swimming and a pre-school programme in direct cooperation with the Danish school in Niebüll. For the admittance in our Kindergarten no special conditions have to be considered. We assume that people choose seriously the Danish day-care center.
